

Professional Line	AnDiMod
Identification number.:	00.95770.200 00X
Resolution:	16-bit ADC with up to 1024-fold oversampling • Processing in 8-byte IEEE real format
Signal input:	12 analog / 3 digital inputs • 6 connections for power supply to the sensors
Areas of application:	-30 ... + 70 ° C • 5 ... 95% r. F. (non-condensing)
Care:	10... 30 VDC
Power consumption:	from 92 mA (12 V) up to 98 mA (12 V) depending on the configuration
Data transfer:	Ser [LOG] bus
Dimensions:	125 x 115 x 72 mm
Weight:	approx. 0.6 kg
Standards and norms:	EMC: IEC 60945
