

power [cube] POWER SUPPLY

The compact cube is an all-weather power pack and rounds off, for example, the rain [e] station in terms of power supply and communication. It not only protects the data logger met [LOG] from all weather influences, but also the power supply unit (24 V / 150 W) and the WiFi router.

- little need for space
- easy installation
- pretty tough
- Universally applicable for various sensors
- 24 VDC, 150 W, 90 ... 264 VAC
- UV and weather resistant housing
