The innovative NeoLED design offers larger apertures, allowing the optical system of the bScope microscope to produce images at higher resolutions, very close to the theoretical diffraction limit of the optics. Other benefits of the NeoLED is the low energy consumption, no heating and a long operating lifetime

#### **KÖHLER ILLUMINATION**

A Köhler illumination ensures for all infinity corrected IOS models the highest possible contrast and the maximum achievable resolving power. It generates a uniform illumination of the sample and eliminates all interference from dust on lenses and side glare of the light source

The Köhler illumination is optional for non-IOS models

#### CORDLESS USE

The optional rechargeable AA batteries turn the bScope into a cordless system

#### **CSS – CABLE STORAGE SYSTEM**

Allows users to easily stow away excess cable length into the back of the instrument during operation and to roll up the power cable for easy storage
